SABAHIYA SHAHUL T S

Front-End Developer

✉ sabahiya1995@gmail.com　📞 +965 97492154　📍 Salmiya, Kuwait　📄 Article 18 (Transferable)

Summary

Experienced Front-End Developer with 4+ years of expertise in developing responsive, high-performance web applications and eCommerce solutions. Proficient in HTML5, CSS3, JavaScript, TypeScript, and comprehensive experience with Angular ecosystem (AngularJS through Angular 20) and React. Strong experience in responsive design, cross-browser compatibility, and performance optimization. Skilled in integrating with CMS platforms and third-party tools, with a proven track record of delivering user-focused digital experiences in Agile environments.

Experience

Front-End Developer
Twisted Mountain Animations(Vancouver, Canada- Remote) - June/2025 -November/2025

Joined a product-based software company developing enterprise-level project management solutions named **Envisage**, specifically designed for the animation industry, managing workflows from project costing to task scheduling and resource allocation.

- Developed advanced features using **Angular 19 and Angular 20**, leveraging the latest framework capabilities for enhanced performance and developer experience.
- Architected and implemented a scalable application structure using **Nx monorepo architecture**, enabling efficient code sharing, consistent development practices, and streamlined build processes across multiple applications.
- Integrated **GraphQL APIs** for efficient data querying and real-time updates, optimizing network performance and reducing data over-fetching.
- Implemented advanced state management solutions using **Angular Signals**, achieving reactive data flow and eliminating unnecessary re-renders to improve application performance.
- Utilized the **PrimeNG component library** to create feature-rich, professional UI components, including advanced data tables, calendars, and interactive charts.
- Established coding standards and best practices for component architecture, ensuring maintainability and scalability across the product lifecycle.
- Collaborated directly with product managers and stakeholders to translate business requirements into technical solutions, gaining valuable product development experience.
- Participated in code reviews and mentored team members on Angular best practices, GraphQL integration patterns, and modern state management approaches.

Front-End Developer
Tamimah Digital (Cochin, Kerala) - january /2022 - june/2025

- Developed scalable and high-performance web applications using the Angular ecosystem (AngularJS, 14, 15, 17, 18), React, and Node.js, leveraging modern tools and techniques to deliver responsive and efficient user experiences.
- Specialized in Angular development with extensive experience implementing cutting-edge features including Angular Signals for reactive state management and improved performance.
- Implemented Angular 18+ features such as standalone components, directive composition API, and an improved reactivity system to streamline development workflows and simplify application architecture.
- Built reusable Angular components incorporating best practices like lazy loading and dynamic imports to optimize performance and maintainability.
- Leveraged Angular HTTP interceptors for consistent API integration and improved error handling across applications.
- Implemented Angular Material to create visually appealing, accessible, and responsive UI components following Material Design principles.
- Developed React applications using React Query and Redux for efficient data fetching, caching, and state management.
- Collaborated with API teams to Integrate RESTful APIs utilizing Angular's reactive patterns and React's useEffect with fetch/axios.

Technical Skills

Languages
JavaScript, TypeScript, HTML5, CSS3, SQL

Frontend
Angular (14,18, 20), React, Bootstrap, Angular Material

Backend
Node.js, Express.js, RESTful APIs

Tools
Git, GitHub, GitHub Actions, Netlify

Key Projects

Mass SMS Management System - Ooredoo, *Tech: Angular 17, TypeScript, RxJS, Angular Material*

- Developed comprehensive SMS management platform for Ooredoo telecommunications handling bulk messaging operations.
- Implemented Angular Reactive Forms with real-time validation for message composition and recipient management.
- Built scalable messaging queue system using RxJS operators for efficient batch processing of messages.
- Created responsive dashboard with Angular Material components for SMS analytics and delivery tracking.

Digital Welfare Platform - Tabseet, *Tech: Angular 18, Angular Signals, TypeScript, HTML5, CSS3*

- Built comprehensive welfare management platform using Angular 18 with Signals for reactive state management
- Implemented Nx monorepo architecture with shared libraries for scalable code organization and reusability
- Developed Angular standalone components with Signals replacing traditional RxJS patterns for simpler state handling

Real-Time Chat Application, *Tech: React, SignalR, JavaScript, HTML5, CSS3*

- Developed real-time messaging application using React functional components and SignalR for instant communication
- Implemented SignalR Hub connections for bidirectional real-time messaging with automatic reconnection handling

Oman Stock, *Tech: React, TypeScript, HTML5, CSS*

- Built secure admin portal using React functional components and hooks with role-based authentication system.
- Implemented Redux for centralized state management handling complex admin operations and user permissions
- Optimized performance using React.memo, useMemo, and lazy loading.

Education

Master Of Computer Application, *University Of Calicut*   2016 – 2019
                                                                                           kerala
